

Press Release

Oporto – February 2nd, 2010

RENEXPO® Portugal 2010 enlarges its network of partners

The network of partners of RENEXPO® Portugal 2010 has been significantly enlarged during the last weeks. The event has already a large number of partner associations, in which the most important Portuguese and European entities working on Renewable Energies and Energy Efficiency can be accounted for. Nevertheless, the REECO Group keeps on working to further expand this network, so that the event has great visibility and relevance, therefore becoming a reference as an informative and business platform in Southwestern Europe's energy panorama.

During the last weeks, the network of partners of RENEXPO® Portugal 2010 – International Trade Fair and Conference on Renewable Energies and Energy Efficiency – has suffered a considerable enlargement. The event is being very well accepted by the several actors within the sector; and this fact is clearly reflected by the number of entities – Portuguese and international – that support RENEXPO® Portugal 2010.

Currently, the event is supported by the following entities:

- CEBIO – Associação para a Promoção da Bioenergia (Association for the Promotion of Bioenergy)
- Associação Portuguesa de Engenharia Ambiental – APEA (Environmental Engineering Association of Portugal)
- Associação Portuguesa da Indústria Solar – APISOLAR (Solar Industry Association of Portugal)
- Sustainable Energy Europe Campaign – European Commission
- Wave Energy Centre (WavEC)
- AEBIOM – European Biomass Association
- European Solar Thermal Industry Federation – ESTIF
- InvestLisboa
- Lisboa Convention Bureau – Tourism of Lisbon
- Lisboa E-Nova – Municipal Agency for Energy and Environment
- Rede Nacional das Agências de Energia – RENAE (National Network of Energy Agencies)
- Sociedade Portuguesa de Energia Solar – SPES (Solar Energy Society of Portugal)
- Swissolar – Association Suisse des Professionnels de l'Energie Solaire (Solar Energy Professionals Association of Switzerland)

Among these entities, some are also partners for the organisation of conferences:

- Conference on Energy Efficient Building (in association with Lisboa E-Nova)
- Conference on Wave Energy (in association with WavEC)

However, the REECO Group – organiser of RENEXPO® Portugal – keeps on working to consolidate this network. The Group is involved in negotiations with other entities; and further developments are expected very soon. The REECO Group is therefore looking to maximize the visibility and relevance of RENEXPO® Portugal 2010, hence transforming this integrated platform into a reference for Southwestern Europe's energy market.
